## ABOUT ME

Highly accomplished Engineering Project Manager with a solid background in leading diverse engineering projects from conception to completion. Skilled in project planning, scheduling, budgeting, and resource management. Proficient in stakeholder communication, risk mitigation, and team leadership. Demonstrated ability to drive project success through effective problem-solving, strategic decision-making, and adherence to industry standards and regulations. Proven track record of delivering projects on time, within budget, and to the highest quality standards.

## EXPERIENCES

2020 - To Date | OWCareers  
Engineering Senior Project Manager

Successfully managed a portfolio of engineering projects, ensuring adherence to project timelines and budget constraints. Led project teams in the development and implementation of innovative engineering solutions, optimizing project outcomes. Implemented project management best practices, resulting in improved project efficiency and client satisfaction. Conducted comprehensive risk assessments and developed mitigation strategies to minimize project disruptions. Collaborated with stakeholders to define project requirements and objectives, ensuring alignment with organizational goals.

2018 - 2020 | OWCareers  
Engineering Project Manager

Assisted in managing engineering projects, supporting project planning, scheduling, and coordination activities. Participated in the procurement process, sourcing materials and equipment to support project execution. Supported the development of project budgets and cost estimates, tracking expenses and identifying cost-saving opportunities. Conducted technical research and analysis to support project decision-making and problem-solving efforts. Assisted in the preparation of project documentation and reports, ensuring accuracy and compliance with regulatory requirements.
